Converge Advantage

Converge creates world-class technology solutions for software, enterprise, and online business customers. We use innovative engagement and process models that are custom-designed to meet client-specific needs and balance a high-level business view with close attention to detail during project execution. From proprietary frameworks to open source components, we leverage best-of-breed technology to provide the greatest advantage to you.

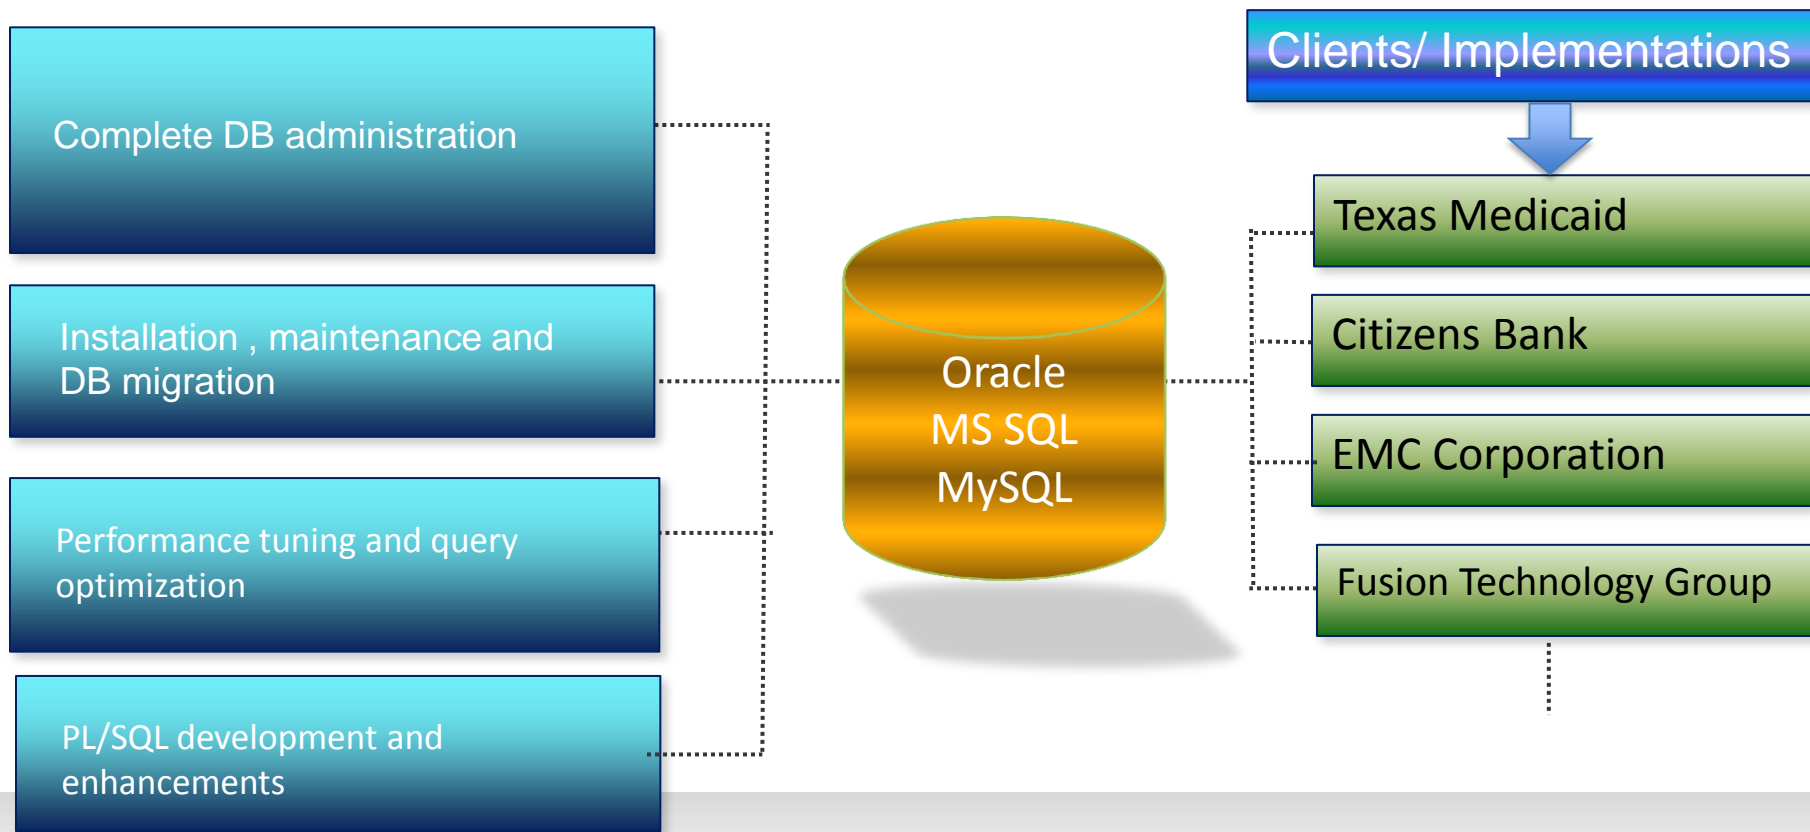

Enterprise Application Development in J2EE/.net

We are pioneers in enterprise application development with j2ee & .net based technologies.

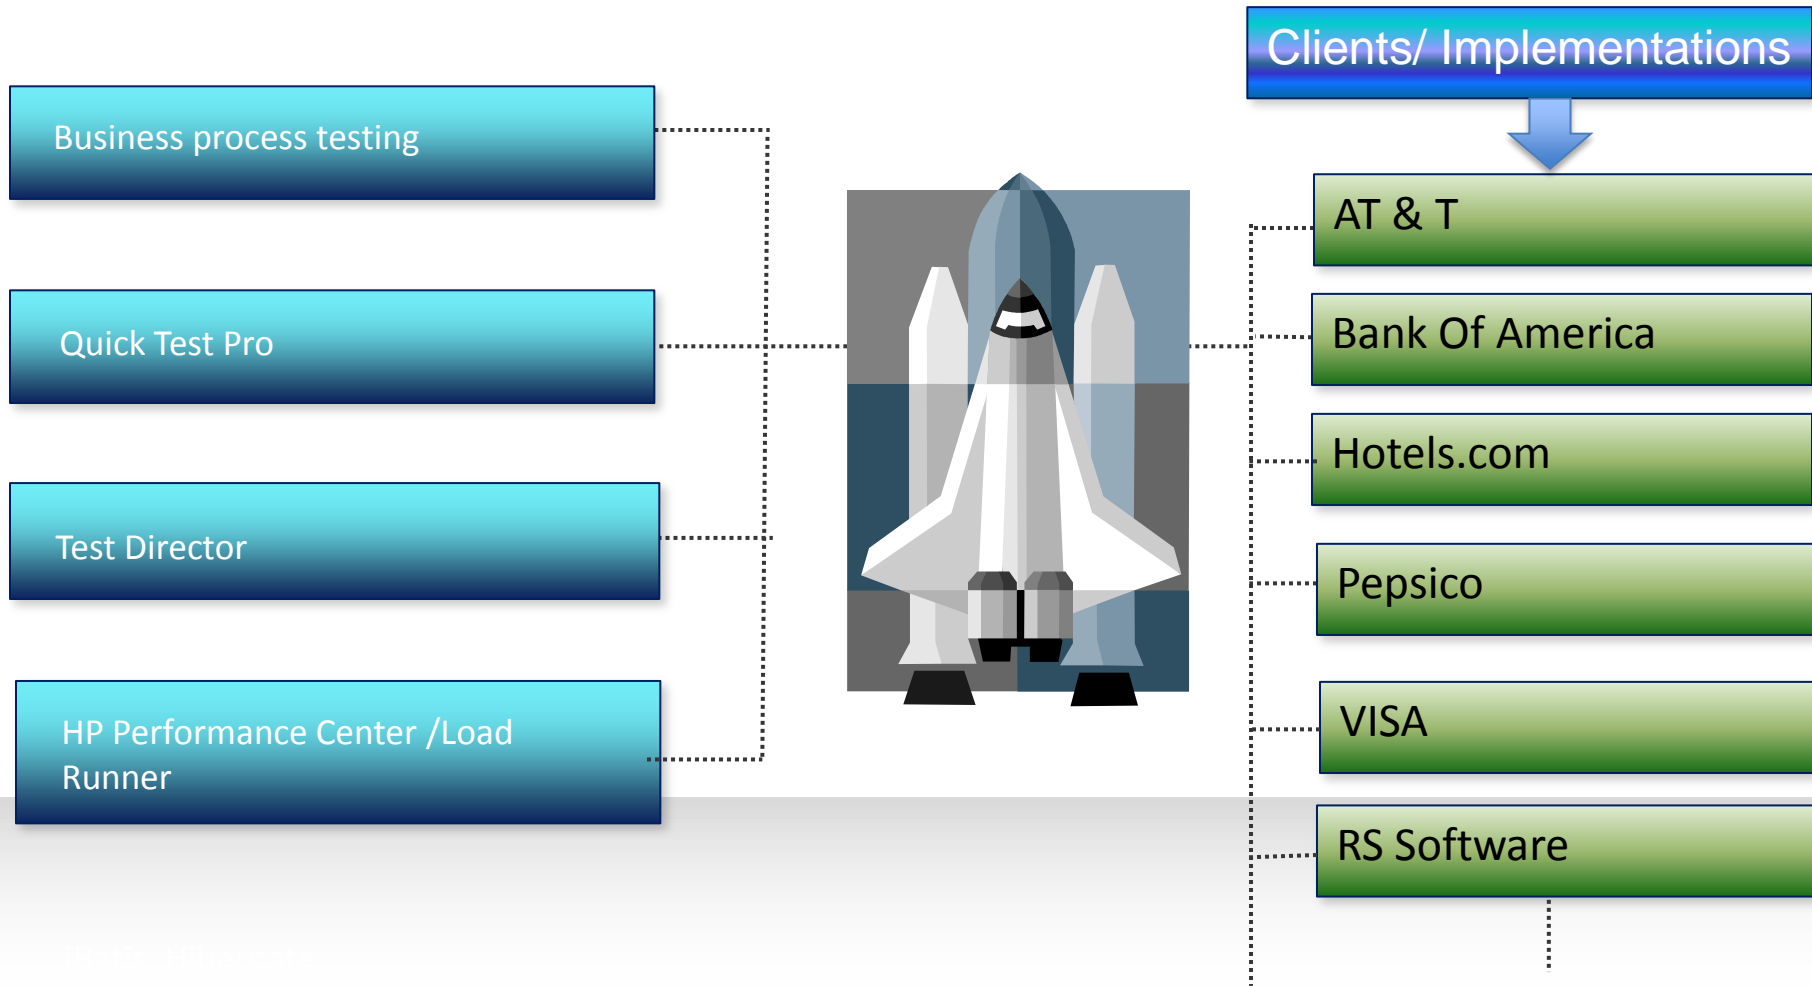

Java Platform, Enterprise Edition (Java EE) 6 is the industry standard for enterprise Java computing. Utilize the new, lightweight Java EE 6 Web Profile to create next-generation web applications, and the full power of the Java EE 6 platform for enterprise applications.

Database Tuning/Administration

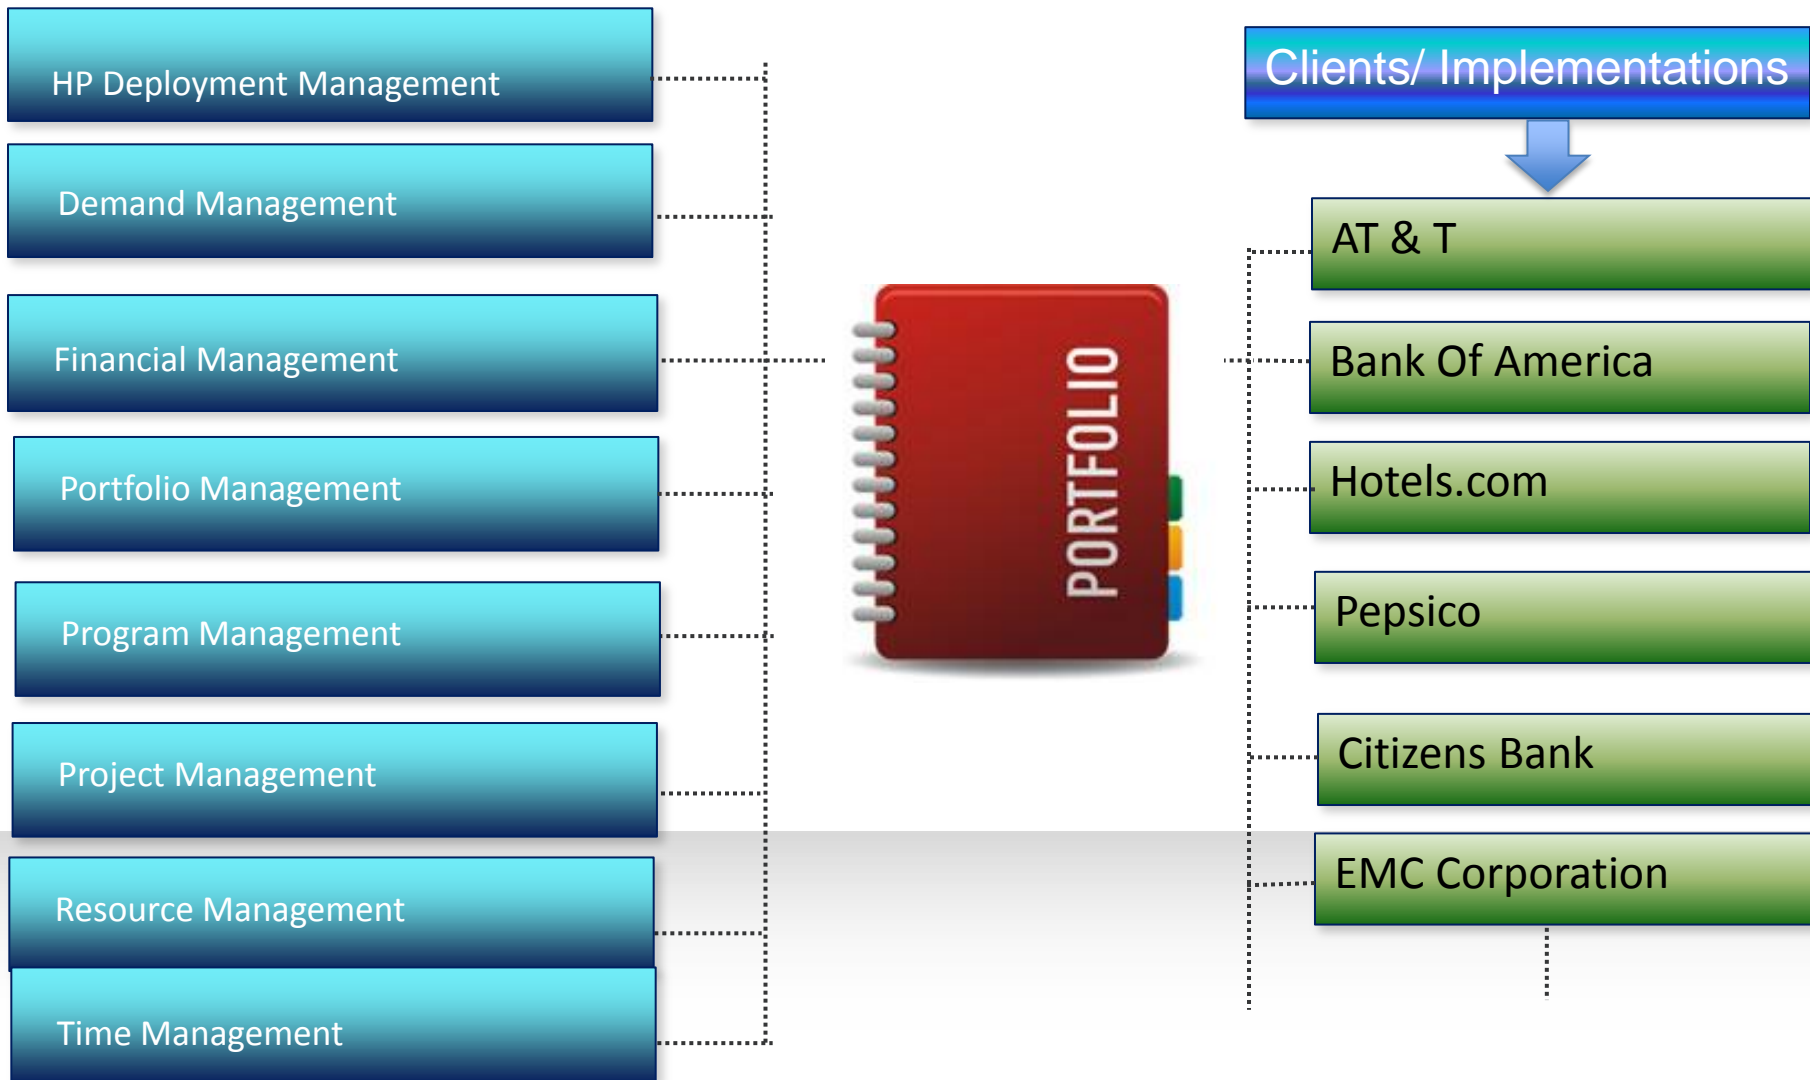

We provide world-class database consulting services to our customers in oracle and MS SQL Server.

Quality Assurance and Performance Management

HP Performance Center can help you prevent costly application performance problems in production by detecting bottlenecks before a new system or upgrade is deployed. This software enables you to measure end-to-end performance, diagnose application and system bottlenecks and tune for better performance—all from a single point of control. The integrated load test, performance test and application stress test features help you reduce the costs and time required to test and deploy new applications and systems into your production environment.

HP Project and Portfolio Management (PPM)

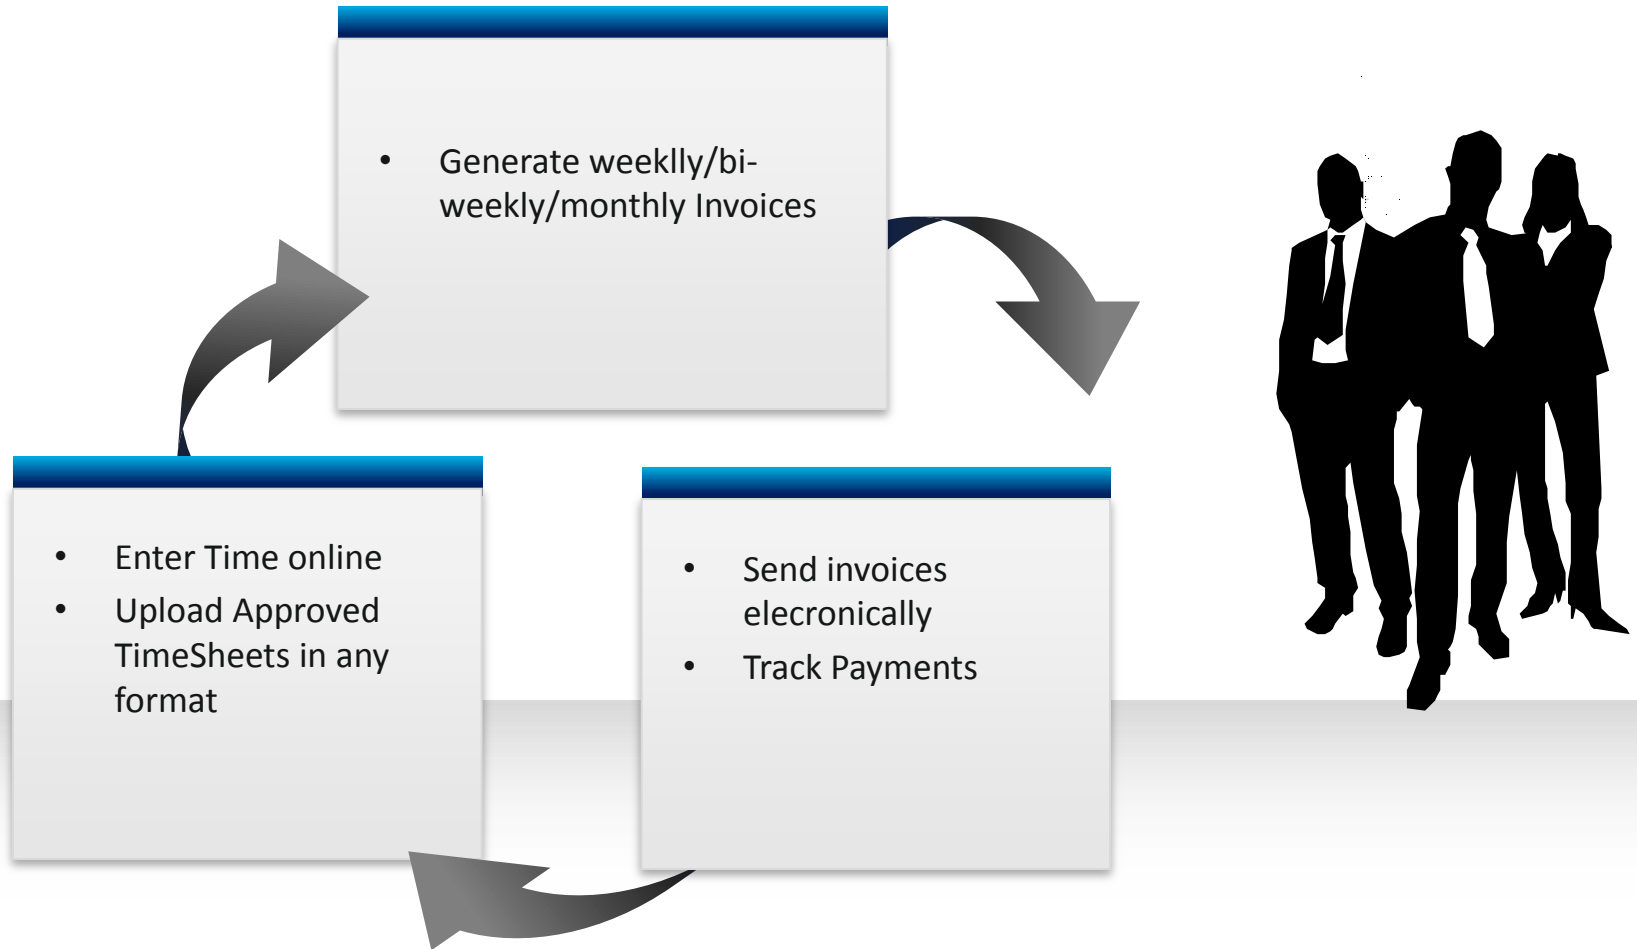

HP PPM Center Demand Management software enables you to capture all the requests made on your IT organization. It allows you to aggregate, prioritize and fulfill demands for both strategic projects and day-to-day activities.

Converge can provide cost effective consulting services for all the PPM modules

Products

Small Business - Time tracking & Invoicing

This is an example text. Go ahead and replace it with your own text. It is meant to give you a feeling of how the design looks including text.

Time tracking & Invoicing – For Small Business (Features)

Track time and Expenses

Time tracking allows you to easily track time, so that you can bill customers for that time and pay employees for the hours worked. Simple and easy for your employees to use.

Manage & approve Timesheets

Submit time sheets for approval and attach weekly/Bi-weekly/monthly timesheets , so that the timesheets can be attached as part of the electronic invoices.

Preview/Generate Invoices

Make your job simple by creating invoices from time sheets. Generate weekly/bi-weekly /monthly invoices based on your client requirements.

Send Electronic Invoices

Send PDF invoices electronically to your clients attaching approved timesheets. Customize your invoices with easily manageable templates.

Track client payments

Track payments with ease using powerful search options, so that you know when a payments slips .

Access 'On the Go'

No matter where you are , access your application from a smart phone or a PDA device.

Track Expenses

Track your employee payments and expenses with intuitive search options.

Client Management Module

Supports unlimited number of clients.

Project Management

Add unlimited number of projects and associate your employees with one or more projects. Manage project billing rates with ease.

User Management

Supports unlimited number of users. Give controlled access to various modules with proper user roles and privileges.

Security & Backups

To make sure your data is secure, we use industry standard data encryption technologies. We protect your data by taking periodic backups to avoid any potential data loss.

No Software to Install & Update

There is no need for you to install and configure any software. Simply use any browser and sign in. You will never need to upgrade any software.

Converge – Mission & Values

Values and Visions

Custom Solutions based on Individual Requirement

Converge creates a solution which is optimized to your requirements; Custom by default.

Contrast this with one size fits all bundles sometimes promoted by companies that rely mainly on product sales. Because we are vendor-independent, we can select the best-fit solution to minimize your Total Cost of Ownership, and maximize your Quality of Service.

Missions and Goals

To provide highest quality services and solutions to our clients and a productive and innovative environment for our employees to excel in the world of Information Technology.
